

CEDAR HIGHLANDS WATER PROJECT UPDATES

Central Iron County Water Conservancy District

LOWER TANK MAINTENANCE

The District has hired NWTLI to recoat the interior of the Cedar Highlands lower tank starting Sept. 23 for about 10 days. The project will involve cleaning, applying an epoxy coating to expand the tank's lifespan, and then disinfecting and flushing the tank. After quality inspection and water testing, the tank will be ready for use. We do not anticipate any service interruptions with this project.

WATER IMPROVEMENT PROJECT: PROPOSED TANK PROJECT UPDATES

Plans are in progress for the new tank that will be buried in the northeast corner of the HOA property. Tank designs have been completed and the District plans to open up bids for the tank construction on October 8th.
